Hard labels are overconfident; temperature scaling and soft labels both repair it
BERT (SHP test)
DeBERTa (SHP test)
observed accuracy
model confidence in its predicted winner
model confidence in its predicted winner
hard labels ECE 0.062
hard + temp. scaling (T=1.48) ECE 0.014
soft labels ECE 0.021
hard labels ECE 0.109
hard + temp. scaling (T=1.91) ECE 0.015
soft labels ECE 0.024
